

If I compare the cost of a Vanity Callsign under the proposed new structure (\$1.63/year for 10 years), to the cost of my Amateur Radio license plate on my vehicle (\$10.00/year), it's a bargain. I just ask that the additional monies collected, go to additional enforcement efforts towards some of the miscreants which appear on 75 and 20 meters.

I understand the FCC is looking for comments on the agency's electronic payment system. I've used it a few times. Never a problem. The interface could use a facelift, but otherwise it works fine
